

Layout

3 main **folders**: data, results, src

data: has raw & processed SPARC spiral galaxy data

results: all plots, chi squares, error analysis

src: all the code

load_sparc_data: loads all SPARC galaxies into a dictionary of Data Frames

models.py: Dark matter density profiles (Uniform, Isothermal, NFW, Burkert)

numerical_methods.py: Euler, Euler-Cromer, RK4

analysis.py: includes chisquare functions/goodness of fit

plots.py: codes for all graphs/figures generated

main.py: calls functions from the module to coordinate project
